

ASHRITH J SHETTY

Seasoned full-stack developer with experience in **designing, building, and deploying scalable enterprise** applications using .NET Core and Angular. Seeking a challenging role in an organization, contributing to technology innovation, leading cross-functional teams, modernizing legacy systems & driving measurable business outcomes.

PROFILE SUMMARY

- Accomplished **Full Stack Developer** with over **9 years of expertise** in designing, developing, and deploying scalable web applications using **.NET Core, Angular, JavaScript**, and modern enterprise technologies.
- Demonstrated ability to **elevate engineering productivity by 30%+** through the delivery of clean, modular, and performance-optimized solutions.
- Experienced in **leading full-cycle development** of critical enterprise products across **globally distributed teams spanning 5+ regions**, ensuring high-quality deliverables aligned with business objectives.
- Recognized for **technical leadership and mentorship**, having trained and guided over **15 interns and contractors**, and participated in **20+ talent acquisition interviews**, significantly contributing to team capability building.
- Proficient in **agile methodologies, DevOps practices & CI/CD pipelines** using GitHub Actions emphasis on code quality, unit testing (Karma, Jasmine) & automation.
- Adept at **modernizing legacy platforms**, driving up to **90% reduction in manual efforts**, **40%+ performance improvements**, and **60%+ savings in development time** through reusable components and scalable architectures.

WORK EXPERIENCE

Intel Corporation – Bangalore, India | Software Engineer | Full Stack Developer | Jan 2017 – Present

- A global leader in semiconductor innovation, advancing technologies in data centers, cloud computing, IoT, and PCs.
- Delivering** scalable and maintainable solutions using **.NET Core and Angular**, resulting in a **30% boost in team productivity**.
- Leading** end-to-end development of **7 high-impact products**, collaborating with teams across **5 global regions**.
- Providing** on-site deployment and user training at multiple Intel factories to ensure seamless product rollout and adoption.
- Mentoring** over **15 interns and contractors**, contributing to team growth, technical development, and succession planning.
- Conducting** 20+ technical interviews, helping to build a high-performing, skilled engineering team.
- Driving** process improvements across **10+ cross-functional teams**, enhancing scalability, quality, and delivery timelines.
- Designing and developing** robust software solutions by translating business requirements into scalable system architecture, functional code, and intuitive user interfaces.
- Testing & debugging** applications to identify, troubleshoot & resolve functional & performance-related issues through development lifecycle.
- Maintaining and optimizing** existing codebases by refactoring, documenting, and enhancing performance to meet evolving business and technical requirements.
- Staying current with** emerging technologies, frameworks, and industry best practices to continuously improve code quality, maintainability, and innovation.

PREVIOUS EXPERIENCE

Evry India – Bangalore, India | Software Engineer | Web Developer | Aug 2015 – Jan 2017

- A software development firm delivering enterprise-grade digital solutions.
- Progressed from a **Recent College Graduate (RCG)** to a core contributor on multiple enterprise and consumer-facing applications.
- Designed and implemented a **centralized API layer**, seamlessly integrating **20+ mobile and web applications**, reducing redundant development by **40%**.
- Developed robust **unit testing frameworks**, achieving **85%+ code coverage** and cutting production bugs by **30%**, leading to higher stability and confidence in releases.

PROJECTS

ENDEAVOR

- Designed and implemented a Reticle Design Module using HTML5 Canvas, reducing manual design time from 10 hours to 15 minutes — a **96% boost** in productivity.
- Architected configurable, reusable API components, enabling faster, more consistent MES 300 integration & cutting **development time by 60%**.

CORE COMPETENCIES

Full Stack Development Lifecycle

Scalable Solution Delivery

Software Architecture & Design Patterns

Agile Project Execution

CI/CD & DevOps Practices

Code Quality & Unit Testing

Enterprise Solution Delivery

Team Mentorship & Capability Building

- Pioneered Reference Checklist tool, streamlining downstream processes & achieving a **95% reduction** in checklist creation time.
- Integrated the PrimeNG framework, optimizing UI components and enhancing Angular compatibility, **resulting in a 40% improvement** in load times.

FACTORY PLAN

- **Modernized 40+ legacy** reporting modules using Angular and Web API, **delivering a 42% improvement** in reporting speed and cutting future **report development effort by 75%**.
- Integrated GitHub Actions to automate CI workflows and enhanced testing with Karma & Jasmine, **achieving 80%** code coverage and accelerating agile delivery cycles.

MSC (Material Service Center)

- Led a team of **4+ to develop** the Auto Ordering feature, utilizing material data to cut order **processing time by 90%** & improve operational efficiency.
- Spearheaded multi-factory deployment of the MSC ordering solution **across 3+ Intel sites**, ensuring seamless integration & optimized workflows.
- Automated the Sub-Assembly Ordering process, reducing manual **tasks by 82%** and improving end-user productivity.
- Acted as the domain expert, overseeing full application lifecycle and ensuring robust performance and usability.

MIDS (Material Information Data System)

- Directed the migration of a legacy application from IIS to a private cloud, enhancing scalability, achieving zero downtime, and reducing **deployment time by 40%**.
- Architected and validated a modular, scalable structure through POCs, cutting dev **time by 33%** and improving maintainability.
- Enforced code quality standards through structured reviews, Git strategy & architectural guidance, **reducing defects by 15%**.

VC (Vacation Calendar)

- Migrated a critical integration system from ETL-based data loading to real-time REST APIs, improving data **sync latency by 90%**.
- Led the infrastructure upgrade to Windows Server 2016, enhancing system **performance by 25%**, aligning with modern security standards — all with zero downtime.
- Served as technical owner, **resolving 95%** of issues within SLA, increasing customer **satisfaction by 20%**, and ensuring consistent high-quality deliverables.

HUB CITY

- Enhanced a real-time integration platform serving **100+ stakeholders**, including consumers, suppliers, retailers & a live commercial café app.
- Built a configuration-driven REST API using Java Spring, enabling scalable **deployment for 20+ iOS and Android apps** and reducing UI **development time by 40%**.
- Developed an automation utility to support **bulk image transfers (100+ assets)**, significantly streamlining deployment and reducing manual intervention.

TECHNICAL SKILLS

- **Languages & Frameworks:** Angular, JavaScript, TypeScript, C#, .Net, .NET Core, HTML, CSS and Bootstrap
- **Tools & Platforms:** Visual Studio, VS Code, Git, GitHub, TFS, JIRA, Docker, Kubernetes
- **Testing:** Jasmine, Karma, Unit Testing, Play wright
- **Databases:** Microsoft SQL Server, PLSQL
- **Others:** REST APIs, IIS, GitHub Actions, Windows Server

AWARDS

- **Critical Talent Award – Intel:** Awarded by the former CEO to **less than 8% of the workforce** for sustained excellence, high-impact contributions, and consistent delivery of strategic outcomes.
- **DRA Award – Intel Manufacturing:** Recognized for innovative reporting solutions in the Factory Plan project that significantly enhanced operational visibility and performance metrics.

EDUCATION

- **Bachelor of Engineering (B.E.)** – Computer Science & Engineering |Srinivas Institute of Technology, Mangalore |**2011 – 2015**

PERSONAL DETAILS

Date of Birth:	25 th September 1993
Languages Known:	English Hindi Kannada & Tulu
